

Buckstone Alpacas

Infection Control

All guests will be required to walk over the foot disinfection mat on arrival to the farm for their alpaca trek. This disinfection mat is also able to be transported when/if we take the alpacas of the farm, in which case the alpacas will be required to walk over the mat when attending venues or returning to the farm. Hand sanitiser will be provided on gateways for use before, during & after alpaca treks and will always be encouraged by our volunteers. We also strongly advise that our customers wash their hands with hot soapy water at the earliest convenience after their trek as hand sanitiser is only a temporary measure.
